Acknowledgements

This project was undertaken at the request of the British Columbia Management Board of the First Nations Forestry Program. Their support has been instrumental in the completion of this report.

Information was gained from many sources, including the First Nations and Tribal Councils of British Columbia, the British Columbia Ministry of Forests, the Canadian Department of Foreign Affairs and International Trade, Public Works and Government Services Canada, Indian and Northern Affairs Canada, the Native Investment and Trade Association and numerous individual First Nation entrepreneurs. The cooperation and assistance of these organizations and individuals is gratefully acknowledged. Their willingness to share their information and complete the survey form are the basis for this report.

The authors are particularly grateful for the support provided by Ms. Heather O'Leary of the Canadian Forest Service throughout this project.

Introduction

The First Nations Forestry Program is a national program designed to increase First Nations' capacity in forest resource management and related business sectors. The program is jointly funded and administered by Indian and Northern Affairs Canada and Natural Resources Canada - Canadian Forest Service. Within British Columbia (B.C.). it is managed by a committee consisting of twelve members representing First Nations, the Canadian Forest Service, Indian and Northern Affairs Canada, and the B.C. Ministry of Forests. The committee is comprised of nine First Nations representatives from communities, businesses and academia, and one representative from each of the government agencies.

The First Nations Forestry Program has provided funding and forestry advice to many of B.C.'s status First Nations in order that they may assume a greater role in forestry activities within their traditional territories. Assistance was provided to foster business development both on and off reserves, through opportunity identification, training, partnership negotiations and entrepreneurial mentoring.

In 1999, the First Nations Forestry Program Management Board requested that an attempt be made to develop a listing of the current First Nation-owned forest sector companies and enterprises in B.C. This was to be an effort to provide as complete a "Who's Who" of First Nations forest sector firms as possible.

Survey forms were developed and sent to all First Nations and Tribal Councils in B.C. in September and November, 1999. In June, 2000, the same survey form was forwarded to all B.C. Ministry of Forests Regional and District Offices to allow their Aboriginal Liaison Advisors to provide details of any additional companies in their areas that they were aware of. Concurrently, reviews were undertaken of several directories available from various public and private agencies that listed First Nations companies to gain additional entries. Finally, individuals within various B.C. First Nation communities were contacted to verify existing data and provide additional entries.

All of the information gathered was input to a customized Microsoft Access database developed by one of the authors. The database was used to generate several reports which make up the text of this directory.

Not all of the First Nations forest companies in British Columbia are included in this document. Some companies and communities elected not to respond to our requests to participate, while others, despite the wide ranging efforts outlined above, may have been missed. It is hoped that companies not included in this edition find it worthwhile to participate in future editions.

While this report is based on information provided by organizations and individuals in response to our requests for information, any errors or misrepresentations are the sole responsibility of the authors. Notification to correct any misinformation contained in this volume would be appreciated.

How To Use This Directory

Alphabetical Company Listing

This section of the directory contains an alphabetical listing of all of the companies contained in the database. They are printed in a "label" format that gives a contact name, the company name, and the company address information.

Listing by First Nation Affiliation

The listings found here show the details for each company, arranged alphabetically by the Tribal Council or First Nation that the company is affiliated with. Company contact information (address, telephone, fax, contact person) and type of business (sole proprietorship, partnership, joint venture, band owned, owned by member) are included as is a list of the type of business(es) the company reported that it was involved in. The listing starts with a few companies that do not show either a First Nation or a Tribal Council affiliation (listed alphabetically by company name), followed by those that only have a Tribal Council affiliation shown (alphabetically by Tribal Council, by company name). These are then followed by the majority of the companies listed alphabetically by band affiliation and then by company name within each band.

Business Activity Listing

The Business Activity section lists the details for each company based on a standardized set of business activities (silviculture contracting, logging, forestry consulting, sawmilling, general forestry, and a few more specific specialized categories), arranged alphabetically by activity. Companies may be listed under each business activity they are involved in if they have reported activity in more than one category.

Listing by Company Location

This section is based on a listing of the companies arranged alphabetically by the city or town that they are located in (from their mailing address). All of the additional company information is contained in this section as well as the previous two sections.
